

ARE YOU GETTING THE MOST OUT OF YOUR APPIAN PROJECTS?

Macedon Technologies offers custom agile methodology training specifically geared toward the successful execution of your Appian projects and continued maintenance efforts after go-live. At Macedon, we want to make sure you get the most out of your digital transformation platform.

Leveraging our deep expertise in both new Appian application development and in sustaining and maintaining portfolios of applications, our experts lead your team through an interactive set of workshops and discussions.

This 1-day training is delivered on-site at a location convenient to you and is tailored to your environment, language, available tools, and needs. The training materials were developed by Stacey Wright, our Director of Delivery and Talent Management and a published author on Appian methodologies and governance.

FEATURES

- Shows historical context of how and why IT projects have failed
- Overview of critical roles and responsibilities that lead to success
- Concrete examples of the cadence of iterative development
- Discussion of measuring by value, including the 80/20 rule and MVP
- Multiple interactive workshops highlight:
 - Building a product backlog
 - Estimating user stories
 - Prioritizing and planning for sprints
 - Providing candid retrospective feedback

BENEFITS

- Ensures a mutual understanding of key terminology for IT and the business
- Provides insight into common failure points and how to avoid them
- Highlights the value of each artifact and meeting - answering "why?"
- Encourages consideration of the definition of ready, done, and success
- For existing agile teams, provides a re-established baseline
- Prepares business to become highly effective Product Owners
