

# MACEDON TECHNOLOGIES

## REMOVE SCHEDULING COMPLEXITY AND INCREASE PRODUCTIVITY

The Macedon Team develops and pilots a field scheduling solution that is tailored to meet the needs of your business. Our services include recommendations on field service scheduling best practices, optimization of existing processes, and building the solution around your unique business requirements.

Leveraging our significant expertise in building scheduling software across a wide variety of industries, we design and create a Field Service Scheduling application to increase your visibility of available resources and approaching deadlines. These applications offer a centralized scheduling view across all your teams and resources, or by engagement or job – both increasing utilization and avoiding double-booking of your critical resources.

For more information or to schedule a demo, please contact us at [sales@macedontechnologies.com](mailto:sales@macedontechnologies.com)

### FEATURES

- Dynamic, resource-centric calendar view shows who is available and engaged
- Real-time visibility into upcoming jobs helps with pipeline scheduling
- Robust Outlook integration ensures calendars across teams are in sync
- Automated, integrated notifications with job details sent to the right people
- Efficient sharing of crucial knowledge through easily generated Excel exports

### BENEFITS

- Provides the visibility needed to prevent overbooking and double-scheduling
- Increases resource utilization by efficiently spreading the workload across your team
- Drives on-time delivery through visibility of upcoming deadlines
- Enhances full-team schedule visibility, allowing use of preferred calendar application
- Aids in pipeline planning through job milestone completion tracking
- Improves client satisfaction
- Delivers continuous value through agile delivery, allowing for rapid updates to match ever-changing business rules and logic

Macedon Technologies has executed 300+ Appian engagements for over 60 clients in private and public sector verticals. Our Appian-based solutions have solved client needs in BPM, workflow, case management, system integration, legacy modernization, and rapid software development at enterprise scale.
