## APPIAN FOR LEGAL ENTITY LIFECYCLE MANAGEMENT

Macedon Technologies is proud to offer an all-inclusive engagement to develop and pilot a Legal Entity Lifecycle Management solution that is tailored to your business.

Leveraging our experience with intelligent case management systems, we will design a custom Legal Entity Lifecycle Management tool that is tailored to your individual business needs. This application can digitize offline processes and streamline the full legal entity lifecycle, including creation, modification, and liquidation.

### FEATURES

- 360 degree view of legal entity, including relevant formation and operating documentation and related entities
- Built-in document management capabilities, including versioning and effective dating
- Intelligent entity name search across dimensions such as jurisdiction and product segment
- End-to-end process management for complete entity lifecycle, including entity formation, foreign qualification registration, bank account creation, entity modification, and entity liquidation
- Integration with industry-standard investment accounting packages such as Investran

### BENEFITS

- Increased visibility into legal entity formation and liquidation processes across stakeholders through centralized process management
- Reduced entity formation errors through automated jurisdiction-specific entity name suggestions
- Process efficiency gains through intelligent routing and task automation
- Faster bank account creation through streamlined entity formation and document collection
- Increased collaboration across compliance, legal, tax, and treasury departments during legal entity creation and modification
- Reduced burden on internal audit organizations through enforced automation of standard processes and intelligent exception tracking
